

## School Management & Student Information Software

How can I - and other members of my school community - access Skoolee Tools?

You can access Skoolee™ Tools over the Internet, a Local Area Network, a single computer, or any combination of the three. If you choose the Internet, we can host Skoolee™ Tools for you and take care of all of your technical issues.

If our school purchases Skoolee™ Tools, who will maintain it?

We put utmost importance on maintaining our products. Therefore, we can directly maintain your Skoolee™ Tools from our remote location without having to visit you on-site, except whenever you wish. This allows us to reply to your needs in the shortest possible time and to maintain and upgrade Skoolee™ Tools for you.

Can Skoolee™ Tools integrate with our existing software?

Likely, you already have software applications running in your school, or you might be developing specific modules. In any case, Skoolee™ Tools is designed to seamlessly integrate with those software products that you have and, thus, does not require that you discard or duplicate those applications.

Can we be assured of support after we purchase a Skoolee product?

Supporting your school is highest on our list of priorities and obligations. In whatever you ask and need, we will work with you through on-site visits, phone calls, e-mail and the Internet.
